1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

PAK-IT Citrus All Surface Floor Cleaner (Concentrate)

Contains:
- Undecan-1-ol, ethoxylated.
- Diethanolamine.
- N-methyl-2-pyrrolidone.

1.2 Relevant identified uses of the substance or mixture and uses advised against

Professional use only: Surface cleaner.
Product is contained in a water soluble sachet and is added to water and diluted before use.

1.3. Details of the supplier of the safety data sheet

Company Name: Big 3 Packaging, LLC
4201 Torresdale Avenue Philadelphia, PA 19124

Emergency CHEMTREC (USA) (800) 424-9300
24 hour Emergency Telephone No. 800-535-5053
Customer Service: Big 3 Packaging, LLC 215-743-4201

2: Hazards identification

The hazard classification and label elements reflect the intrinsic properties of the concentrate product as supplied, which is sealed in a water soluble sachet. The sachet when intact provides a barrier to dermal and inhalation exposure under conditions of normal handling and use. The precautionary statements are applicable under conditions of potential exposure to the concentrate itself. The product when used as recommended in diluted form is not classified as hazardous.

2.1 Classification of the substance or mixture

2.1.1 Classification according to Regulation (EC) No 1272/2008 (CLP)
Acute toxicity Category 4; H302.
Skin irritant Category 2; H315.
Eye damage Category 1; H318.
STOT SE Category 3; H335.
Reproductive toxicity Category 1B: H360D.

2.1.2 Classification according to Directive 1999/45/EC
Harmful; R22.
Irritant; R38, R41.
Toxic for reproduction Category 2; R61.

2.1.3 Additional information
For full text of R-phrases and Hazard- and EU Hazard- statements: See SECTION 16

2.2 Label elements

2.2.1 Labelling according to Regulation (EC) No 1272/2008 (CLP) (as amended)

### 4: First aid measures

The measures below are specifically applicable in event of exposure to the product in concentrate form.

#### 4.1 Description of first aid measures

**General advice**
Immediate medical attention is required if in contact with concentrate product. Move out of dangerous area. Show this safety data sheet to the doctor in attendance.

**Inhalation:**
Move exposed person to fresh air. Keep person warm and at rest if not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Get medical attention immediately. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Ingestion:**
Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest if the sachet or concentrate material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention immediately.
Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Skin contact:**
Wash skin immediately with soap and water. Get medical attention if irritation develops and persists. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Wash clothing before reuse.

**Eye contact:**
Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Protect unharmed eye. Continue to rinse and get medical attention immediately. Continue to rinse during transport. If eye irritation persists, consult a specialist.

### 4.2 Most important symptoms and effects, both acute and delayed

**Over-exposure signs/symptoms**

**Inhalation:**
Exposure to the solvent vapour may cause irritation of respiratory tract.

**Ingestion:**
No specific information.

**Skin:**
Prolonged or repeated exposure may cause irritation to skin

**Eyes:**
Contact with eyes if not treated immediately has the potential to cause serious damage to the eye.

See SECTION 11 for more detailed information on health effects and symptoms.

### 4.3 Indications of any immediate medical attention and special treatment needed

**Notes to physician:**
No specific treatment. Treat symptomatically.

**Protection of first aid personnel**
No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.
5: Firefighting measures

5.1 Extinguishing media

Suitable:
Use water spray, fog or alcohol resistant foam, carbon dioxide.

Not suitable:
Do not use water jet.

5.2 Special hazards arising from the substance or mixture

Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products

In combustion may emit toxic fumes.

5.3 Advice for firefighters

Special precautions for fire-fighters
Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Avoid contact with skin, eyes and clothing to the product concentrate from damaged or leaking packets.

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8). Avoid breathing vapour or mist.
6.2 Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3 Methods and materials for containment and cleaning up

Small spill:
Move containers from spill area. Dispose of via a licensed waste disposal contractor. Stop leak if without risk. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container.

Large spill:
Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Dispose of via a licensed waste disposal contractor. Stop leak if without risk. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Contaminated absorbent material may pose the same hazard as the spilled product.

6.4 Reference to other sections

Note: see SECTION 1 for emergency contact information, SECTION 8 for personal protection and section 13 for waste disposal.

7: Handling and storage

The intact sachets can be handled without the need for personal protective equipment while ensuring that care is taken when handling to avoid damage, leakage or spillage. In the event of potential exposure to the concentrate product the following precautions are applicable.

7.1 Precautions for safe handling

Avoid contact with skin, eyes and clothing.

Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking.

Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight, in a dry, cool and well-ventilated area, away from incompatible materials (see section 10), food and drink. Store between 4°C and 60°C. Keep outer container tightly closed and sealed until ready for use. Reseal after use. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

7.3 Specific end use(s)

Not applicable.

### 8.2 Exposure controls

The following applies to exposure to the concentrate. The sachets may be handled in accordance with Section 7.

**General**
Avoid contact with skin, eyes and clothing.

**Hygiene measures:**
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Ensure that there is sufficient ventilation of the area.

**Eye and face protection**
Wear tightly fitting safety goggles, safety spectacles and/or face shield (visor) with CE-label.

**Skin protection**
Wear chemical protective gloves according to DIN EN 374 with CE-labelling. Suitable materials include Nitrile rubber, NBR. Gloves for mechanical protection do not provide protection against chemicals.

Wear protective clothing.

**Inhalation**
Provide a good standard of general ventilation. Use outdoors or ensure not less than 3 to 5 air changes per hour. In case where occupational exposure limits may be exceeded wear a suitable respiratory protective device with vapour filter with CE-labelling. Applicable standards for continuous wear time of less than 2 hour are BS EN 140 mask and BS EN 143 Filter; BS EN 1827.

9.2 Other information

Not applicable.

10: Stability and reactivity

10.1 Reactivity

Stable under normal conditions. Hazardous polymerisation will not occur.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions
Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid

Avoid extremes of heat (>60°C) and cold (<-1°C).

10.5 Incompatible materials

Avoid strong bases, acids and strong oxidising or reducing agents.

10.6 Hazardous decomposition products

In combustion may emit toxic fumes such as oxides of carbon and sulphur.

11: Toxicological information

11.1 Information on toxicological effects

No data is available on the product. Based on the hazardous substances in the mixture and their concentration, the product has been assessed according to the calculation method of Regulation (EC) 1272/2008.

(a) Acute toxicity

Oral

Based on the available data on component substances, the product is harmful by ingestion due to the presence of the Alcohol Ethoxylate compound ‘Undecan-1-ol, ethoxylated’.

Dermal

Based on the available data on component substances, the classification criteria for acute dermal toxicity are not met.

Inhalation

Based on the available data on component substances, the classification criteria for acute inhalation toxicity are not met.

Other routes

No data.
(b) Skin corrosion/irritation

Based on the available data on component substances, the product may cause skin irritation.

(c) Serious eye damage/irritation

Based on the available data on component substances, the product may cause serious eye damage due to the presence of Diethanolamine and the Alcohol Ethoxylate compound ‘Undecan-1-ol, ethoxylated’.

(d) Respiratory or skin sensitization

Based on the available data on component substances, the classification criteria for respiratory or skin sensitisation are not met.

(e) Germ cell mutagenicity

Based on the available data on component substances, the classification criteria for germ cell mutagenicity are not met.

(f) Carcinogenicity

Based on the available data on component substances, the classification criteria for carcinogenicity are not met.

(g) Reproductive toxicity

Based on the available data on component substances, the product is classified as a development toxin due to the presence of N-methyl-2-pyrrolidone. Reproductive toxicity studies in animals have shown that over exposure to N-methyl-2-pyrrolidone cause’s developmental effects including post-implantation loss, malformation and foetal mortality.

(h) STOT-single exposure

Based on the available data on component substances, the product is classified as a respiratory irritant.

(i) STOT-repeated exposure

Based on the available data on component substances, the classification criteria for specific target organ toxicity resulting from repeated exposure are not met.

(j) Aspiration hazard

Based on the available data on component substances, the classification criteria for aspiration hazard are not met.

Other information

No other known significant effects or critical hazards.
12: Ecological information

12.1 Toxicity

No data is available on the product. Based on the hazardous substances in the mixture and their concentration the product has been assessed according to the calculation method of Regulation (EC) 1272/2008.

The product is not classified as dangerous to the environment.

12.2 Persistence and degradability

12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be PBT or vPvB.

12.6 Other adverse effects

No information.
13: Disposal considerations

13.1 Waste treatment methods

Methods of disposal:
The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Hazardous waste:
The classification of the product may meet the criteria for a hazardous waste.

14: Transport information

Product is not classified as dangerous for transport.

14.1 UN number
Not applicable.

14.2 UN proper shipping name
Not applicable.

14.3 Transport hazard class(es)
Not applicable.

14.4 Packing group
Not applicable.

14.5 Environmental hazards
Environmentally hazardous and/or Marine Pollutant: No

14.6 Special precautions for user
Not applicable.

14.7 Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code
Not applicable.
15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

REACH Status
Where applicable, the substance(s) in this product has (have) been pre-registered, registered or are exempt according to Regulation (EC) No. 1907/2006 (REACH).

Detergent Regulation [Regulation (EC) No 648/2004]
Product ingredients include:-
- 30% or more of alcohol ethoxylate surfactant, Undecan-1-ol, ethoxylated.
  less than 5% of Benzyl Acetate, Orange II (Sodium 4-[2-hydroxy-1-naphthyl]azo]benzenesulphonate).

SEVESO II Directive 96/82/EC (as amended).

UK Regulations

COSH& – Control of Substances Hazardous to Health Regulations 2002 (as amended).
COMAH – Control of Major Accidents Hazards Regulations 1999 (as amended).

15.2 Chemical safety assessment

Chemical safety assessments have been conducted by various REACH Registrants for some of the substances listed in Section 3.2.
16: Other information
